B.S. Software Engineering

Rose-Hulman Institute of Technology

2012-2016

## EXPERIENCE

Software Engineer – DMI (Digital Management, LLC)

Indianapolis, IN / July 2016 – Present

Software consultant working directly with key business stakeholders to provide high-quality and reliable solutions that best fit the business needs.

### Current Client – ADESA Auto Auctions

- Worked in a fast-paced Agile environment.
- Implemented key features for mission-critical .NET Core APIs.
- Implemented full-stack features for POC applications.
- Led team discussions on ways to improve our development processes including: code reviews, remote working arrangements, and team communication.
- Performed Quality Assurance tests to ensure new features met acceptance criteria.
- Presented new products and features to key business stakeholders in order to solicit feedback and highlight our team's excellent work.
- Monitored production environment performance and provided support as needed.
- Worked in a mixed location team as both an on-site and remote resource.

### Key Achievements Include:

- Successfully launched a business-critical API that integrates with a third-party front-end application that serves nearly 100k requests per day across more than 80 different auction sites.
- Won an award at the company's innovation showcase for implementing a new feature for an internal testing tool.
- Completed a high-quality, full-stack Angular/Node.js POC solution in a matter of two two-week sprints in order to solicit early customer feedback.
- Presented at internal tech talks to demonstrate new and exciting technologies.

Previous Clients Include: Allison Transmissions, Defenders, Preferred Warranties Inc.
